ENERGY RESEARCH
INTERNSHIP
APPLICATION
DEADLINE
MARCH 15**

The Delaware Energy Institute (DEI) Energy Research Internship (ERI) program is a 10-week summer internship designed for chemical engineering and chemistry undergraduate students with a minimum GPA of 3.0. We are soliciting applications from freshman, sophomores, and juniors for the Summer of 2024. The positions are in the Vlachos Group in ISE Lab and include a competitive stipend.

Available projects include: experimental catalysis, reaction engineering, and computational catalysis (applications of quantum chemistry and/or machine learning), focusing on biomass conversion, renewables, plastics, process intensification and green engineering, and plasma catalysis.

Applications should include: (1) a Statement of interest in an experimental or computational/modeling project; (2) a Statement of interest in research in computational or experimental work; and (3) a resume and unofficial transcripts.
